DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of group I comprising claims 35 – 40 in the reply filed on 2/2/2006 is acknowledged. The traversal is on the ground(s) that the inventions are related. However, as discussed in the restriction election requirement mailed 1/3/2006, each of the inventions, through the incorporation of different method steps, can be considered as having a different mode of operation. The different inventions incorporate different features that would involve different considerations in determining patentability. Different search criteria and patentability determination issues are involved in the examination of each invention. Claims 41 – 53 have been withdrawn from consideration. The requirement is still deemed proper and is therefore made FINAL.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1743

Claims 35 – 40 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 25, 27, 30, 31 33 and 34 of copending Application No. 09/682,900. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the instant application are encompassed in scope by the claims of the copending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
